(54) Title: **HYBRID RECORDABLE OPTICAL RECORD CARRIER**

(57) Abstract: The present invention relates to a recordable optical record carrier which can be used to make a back-up of the full content of a SA-CD disc. The proposed record, carrier comprises: a first transparent substrate layer (1), a first semi-transparent recordable information layer (2) including an organic dye material having a high data storage capacity, a second transparent substrate layer (4), a second recordable information layer (5) including an organic dye material having a lower data storage capacity than said first information layer (2), and a cover layer (6).
